if you enjoy hack and slash badass games, this is one i would recommend. good graphics, fun combos, different classes to play as (my favorite is the warrior), enemies with animations that are actually good, and lots of excersize! (add some wrist weights and you have a serious upper body workout here) The devs are pretty pationate about their game which is a really good thing. Looking foward to seeing how this game progresses in the future!. I really like the game. It is a good and fun way to kill the time.

One thing that I do not like is that you can not change the direction of the branches so they do not always fit where I want them to.. HMM ok so it crashed a few times just trying to start it then finally i was stuck at the screen that says grab the wheel... GG! maybe wait till more updates are out but the game is 100% unplayable at it's current state not sure what the money is for, so many free playable games out there lol

New update is out and i am still stuck at Grab the wheel :( For those of you who enjoy resource games like Banished or Planet Base this is the game for you. It posseses many of the same features but taken to the next level. The layers of crafting are farily intricate. In addition you have the added dimension of a research tree and the problem of managing 3 colonies at a time where each colony is interdependant on the others. Throw that together with the threat of robbers and aliens and you have a game that will keep you entertained for hours. At the beginning of the game you have "advisors" they do a great job at stepping you through some of the beginning phases but the mechanics are designed where you need to be increasingly more creative. This system allows you to jump right into playing the game with a very easy learning curve. If you don't want to be constrained by the story they also have a sandbox mode. All in all I think this is the best resource game I have played. I think it better even then banished or planet base. One last thing the price point on this game is well worth it. Buy it you'll love it.. I'd sooner buy this than Denuvo malware-infested FFXV from Square, and I did.. This game.... Well, I will mention something that I haven't seen anyone else mention yet. The game was a pain in the butt to get to work. My PC is made to play games, but this game was a nightmare to get to work right, the inventory didn't work, at first, I had to scrap 3 videos because the game was so bugged I couldn't finish it.

But, once I did get it to work, I had a pretty fun time with the game, the music is tense at moments and can get you a little uneasy. The puzzles were pretty interesting, the ending was... Dissapointing... To say the least.. Not terrible difficult in the start, but as it goes it get frustratingly harder... found myself fixed on playing to get the last achievements, and would not even realize the time flying!! Definitely challenging, and great for a quick game!. There is a reason why every review here is positive, it's an interesting little game. I don't like the moving walls segments much, but hey.. Perfect way to scratch that "I need to play an economic simulator game" kind of itch. If you don't know that feeling, this game might not be your thing.. I love First Person puzzle games (such as Portal) and Magnetic: Cage Closed definitely scratches that itch. Really enjoying it so far! Can't wait to play more, hunt achievements, and sniff out speed run routes!

There's a trend amongst indy devs to go beyond just trying to make a game look pixel and old because they couldn't afford an artist, and making games look even more pixellated and low effort than even old games used to be - deliberately! This is one example of this new crime against gamers.

Once you get past the horribly low effort graphics, the gameplay is very weak, something like Zeliard but made more annoying because of the poor graphics and somewhat clunky controls.

To make matters worse, there's no even a readily available fullscreen option, no mouse support, and unintuitive controls.

Clearly not made for PC gamers.. Fun at first but then all villagers just get stuck. would'nt rekommennd it until the game is out of early access. I honestly don't know what to make of this game. To me, its perfectly average.

Pros:

-if anything, it fixed and improved my english vocabulary

- the story, i guess

Cons:

-soundtracks kinda annoying

-Asain people contantly yelling in my ear.

when i first played this game, i got a headache from the consistent yelling and random sound effects, not to mention its subpar soundtrack. But based on gameplay and orthe aspects and criteria, this game is intriguing. all the cons i pointed out can be avoided by playing this game on mute, so it really isn't much to complain about. i don't know, you can decide whether you like this game or not. it up to you.. Another year another cricket captain. While it might look like not much has changed since last year under the surface the new camera and improved odi games make it much more enjoyable. The first class games also seem improved and it is the most addictive cricket captain in recent times.

At a resonable price this game goes down as a Chads Choice.. very difficult game, either i am painfully bad at this game or it's impossible as i cannot seem to pass even the first tutorial. Fun

+Creative

+Roguelike

+Awesome

-Controls a little glitchy

4/5

This is a really awesome, different take on a roguelike game. If you like Rogue-likes and games that really make you think this is for you!

. For some reason on the first level my criminal doesnt move idk why and i have been watching other youtubers playing this game and their bad guy moves.

any ideas?. Interesting concept, but the execution falls flat. Worth \$2-3 for an evening distraction if you find it on sale, but it's nothing more than that. I finished the game in about 4 hours total (left it running through the day on accident, thus the extra hours on my record).

There's nothing open ended to the game, it's all about finding the exact right string of commands to get to the next part of the story. Guessing passwords is a 50V50 split, either it's completely handed to you or you're left with almost no clue.

If you really want a fantasy hacker game, look up Uplink instead.
